

$$\textcircled{1} \quad \text{RHS} = 1 - P(A) - P(B) = 1 - (P(A) + P(B)) = 1 - (P(A, B) - P(A), \text{ } \textcircled{2})$$

a)  
 \textcircled{2} define  $P = \text{door player selected}$ ,  $H = \text{door host opened has gold}$   
 $L = \text{the door that player didn't select and host didn't open has gold}$   
 $\Omega = \{P, H, L\}$

b) given  $P(P) = P(H) = P(L) = \frac{1}{3}$

$$\text{prob of winning if stayed} = P(P | H^c) = \frac{P(P, H^c)}{P(H^c)} = \frac{\frac{1}{3}}{\frac{2}{3}} = \frac{1}{2}$$

$$\text{prob of winning if moved} = P(L | H^c) = \frac{P(L, H^c)}{P(H^c)} = \frac{1}{2}$$

\textcircled{3}
